SterilTube

SterilTube has been independently proven to inactivate 99.98% of HCoV OC43 and Adenovirus-5.

Designed to target aerosolised virus and bacteria that is scientifically proven to hanging in the air for up to 3 hours in indoor environments.

Our germicidal UV-C LED light, is securely encased in a “kill chamber,” inactivating micro-organisms, like flu, virus, bacteria and mould, while being 100% safe for humans.

SterilTube works by circulating airflow, sanitising both air and surfaces to more effectively prevent infection.

SterilTube comes in three models, 40, 100 and 150, with **SterilTube 40**, the smallest size model, capable of sanitising 16 cubic meters per hour.

SterilTube 40 is suitable for meetings rooms, offices, waiting rooms or the home.

Like all SterilTube products, using our patent pending UV-C LED light design, we are the only UV-C light on the market that is safe to operate while people are in the room 24x7.

SterilTube 100, is the mid-sized model, ideal for a medium-sized rooms such as Hotels foyer or hall ways, Doctor or Dentist waiting rooms, school class rooms etc.

The SterilTube 100 is able to sanitize up to 35.93 cubic meters per hour and enabling 24x7 ongoing sanitisation without disrupting ongoing business for manual cleaning processes. SterilTube also eliminates odours and reduces the need for expenses associated with germicidal chemicals.

SterilTube 150, the largest model, is designed for large room environments such as larger hotel foyer, airports, larger gyms and event rooms and has been designed to be mounted directly on a wall.

The SterilTube 150 has the capacity to sanitize over 100 cubic meters per hour and be managed by a Mobile App.

The SterilTube series can be applied in any type of commercial business or domestic residence: Hospitals, Aged Care, Schools, Hotels, Gyms, Business Offices, GP and Dentist waiting rooms, etc.

The SterilTube was designed to address the problem of treating aerosol virus that hangs in the air for up to 3 hours after an infected host exhales, speaks, coughs etc.

And independent laboratory tests by Modena University medical laboratory have verified the SterilTube inactivates **99.98% of virus** active in the room being treated. The Modena test also reported SterilTube to be 99.97 effective within just 10 minutes of operation.

The long life of our germicidal UV-C LED light (70,000 hours), provides our customers with a 3-4 times longer lasting product, than any competitor and lowers maintenance and replacement costs.

Inside the SterilTube is our unique patent pending design, using aluminium to encase our UVC LED “kill chamber” and while effectively inactivating 99.98% virus and bacteria is 100% safe for humans to be present while operating, improving productivity, with no down time for manual cleaning and no expensive or hazardous chemical agents.

Available in three colour variants: White, Black and Silver. Orders can be placed at www.steriltubeaustralia.com

SteriTube 40

Product name	SteriTube 40
UV-C wavelength	265 nm-285 nm
Lamp life	70,000 hours (Approximately 7 years)
Size of Area Sterilized	16 m ³ per hour
UV-C LED Light	YKP3535+IC
Voltage	220V AC / 12V DC
Power consumption	18 Watt
Material	Aluminum
Power of UV-C radiation	5 W
Noise emissions (dB)	35.8 Decibels
Weight	0.75 Kg
Length	382 mm
Degree of protection	IP42

SteriTube 100

Product name	SteriTube 100
UV-C wavelength	265 nm-285 nm
Lamp life	70,000 hours (Approximately 7 years)
Scope of sanitation	35.93 m ³ per hour
UV-C LED Light	YKP3535+IC
Voltage	220V AC / 12V DC
Power consumption	24 Watt
Material	Aluminum
Power of UV-C radiation	5 W
Noise emissions (dB)	35 dB
Weight	1.5 Kg
Length	600 mm
Degree of protection	IP42

SterilTube 150

Product name	SterilTube 150
UV-C wavelength	265 nm-285 nm
Lamp life	70,000 hours (Approximately 7 years)
Scope of sanitation	100.241 m ³ per hour
UV-C LED Light	YKP3535+IC
Voltage	220V AC / 12V DC
Power consumption	35 Watt
Material	Aluminum
Power of UV-C radiation	5 W
Noise emissions (dB)	35 dB
Weight	2.5 Kg
Length	1100 mm
Degree of protection	IP42
